- GitHub
- GitLab
- Bitbucket
- Trello
- Git

TESTING

- RSpec
- Rubocop
- REST Architecture
- Agile Methodologies
- MVC

WORK EXPERIENCE

Jr. Software Developer

Shriffle Technologies Pvt Ltd.

July 2022 - May 2024

- I have experience in developing web applications, and server applications.
- Designed, built, and maintained robust Ruby on Rails applications, ensuring scalability and performance optimization.
- We implemented server-side logic and integrated databases, including designing and optimizing database schemas for Agile efficient data storage and retrieval.
- Designed and developed RESTful APIs to enable efficient communication between client-side and server-side components.
- Wrote comprehensive unit tests using RSpec to validate application functionalities and ensure code quality and reliability throughout the development lifecycle.
- Implemented security best practices such as authentication, authorization, and data encryption to protect applications and sensitive user data.
- Good understanding of all phases of the software development life cycle.
- Collaborated with team members to deliver products on time.

Ruby on Rails Developer

Deqode

June 2024 - Present

- Experienced in application development, support, and enhancement of real-time web-based applications based on Ruby.
- Proficient in multiple languages like Ruby on Rails, Javascript, HTML, and CSS.
- I have worked with multiple databases such as MySQL, SQLite, and PostgreSQL.
- Expert in object-oriented programming OOP concepts using Ruby.
- Expert in Distributed Version Control Systems like Git and Bitbucket.
- Worked with Product managers and the QA team to fix bugs and provide a better user experience.
- Knowledgeable in RESTful API development and integration to enhance application functionality.
- Familiar with testing frameworks like RSpec to ensure code quality and reliability
- Practiced in Agile methodologies, utilizing tools such as JIRA for project management and issue tracking
- Competent in Continuous Integration And Continuous Deployment (CI/CD) processes, using platforms like GitLab.
- Experienced in implementing applications following the Model-View-Controller (MVC) architecture for maintainable codebases.

EDUCATION

B Tech. || Swami Vivekanand College of Engineering || August 2019 - March 2023 (7.77 CGPA)
